

Radar 132cm DC Fan Only in Oil Rubbed Bronze

DESCRIPTION

Introducing the Radar, a meticulously crafted ceiling fan with 1320mm timber blades. Its blend of style and functionality is paired with outstanding performance, delivering exceptional airflow in a single, elegant package.

Available in white, black, oil-rubbed bronze with dark koa blades, white with oak blades and brushed chrome with teak blades.

Low Profile

Low profile fans that fit your space are necessary if your home has low ceilings. Some of these ceiling fans only protrude 19.5 cm from the ceiling, allowing them to sit flush against the ceiling. This makes the space safer for everyone in your house and makes it appear less cluttered and more open.

DC Motor - Efficient, Cost Saving, and Quiet

The most energy-efficient ceiling fans on the market right now are DC or direct current, fans. The key to their improved airflow and low energy consumption is their motor, which also helps you save money on your electricity bill. Since the motor is small and light, DC ceiling fans have sleek designs that fit better in your interiors and cost just one cent an hour to run. Additionally, they are silent in operation, making them ideal for private spaces in your house like the bedroom. You have a lot of versatility with the speed settings of DC fans, which range from a light breeze to an extremely intense airflow.

Remote Control

6-speed remote control with timer function and natural wind mode included. For instructions on how to pair the remote, please follow the steps in this video: [Remote Pairing](#)
